

Jeffrey C. Simon, CTP

Jeff has over 30 years experience in transportation management and safety. He has an excellent understanding of Motor Carrier Safety Regulations (State and Federal) and Hazardous Materials Regulations. He is a nationally recognized speaker, presenting seminars and on-site training to an international audience.

A strong practical operations management background acquired working as an operations and equipment manager, as well as through owning and operating his own company, strengthens the value of his recommendations.

Jeff has authored several published articles in Occupational Health and Safety Magazine, Environment Protection, EH&S Products-The Product Newsmagazine for Environmental Health and Safety Professionals, Engineer's Digest, and J. J. Keller Publications.

He has served on national enforcement and industry committees, assisting in setting the direction for future legislation.

PROJECT EXPERIENCE

Motor Carrier Compliance Assessment

Conduct on-site, simulated DOT compliance reviews including a tentative safety fitness rating. Recommendations for improvements in the six safety evaluation areas:

- Risk Management & Accident Reporting
- Driver Qualification & Control
- Operational including Hours of Service Limits
- Vehicle Maintenance Procedures
- Hazardous Materials
- Accident Frequency & Prevention

Implement the necessary changes to improve ratings and profitability.

Prepare companies for a DOT audit and manage the actual review.

Safety Management

Design, implement, and establish corporate policies and procedures necessary to incorporate a safety and compliance culture. Can work with or in place of a staff safety director until implementation is complete.

Curriculum Design and Training

By incorporating the latest adult learning techniques and delivery techniques, training is performance-oriented and entertaining.

Over 50,000 students throughout the U.S. and Canada.

20 Different Curriculums including:

- Motor Carrier Safety, How to Pass a DOT Audit, Hazardous Materials Certification (Basic and Advanced), Security Assessment & Plan, Safety Coordinator Certification, Basic Defensive Driving Techniques, Reasonable Suspicion Supervisory, Hours of Service, Accident Control & Prevention, Train the Trainer, Basic Management Skills Development, Government & Utilities

Hazardous Materials Assessments and Certification

Conduct facility audits for all HM involvement including HM waste.

Design the appropriate hazardous materials handling procedures to legally offer and transport by highway, air, or water.

Implement security and emergency response plans.

Conduct the required employee certification.
